

Quality Policy

Tesla Engineering Ltd will endeavor to continue to improve its technical capability, further diversify its customer base and seek new market opportunities.

Tesla Quality Management System operates in accordance with ISO9001:2015 and ISO 13485:2016 to ensure that magnet systems designed, manufactured, installed and serviced by the Company comply with regulatory and customer requirements.

Managerial and organisational processes of the Quality Management System are described within the Quality Manual. These processes ensure that finished products, manufactured to the customer's specification meet regulatory requirements and are delivered on time at a competitive price.

We will continually improve our Quality Management System and product quality by setting quality objectives which are monitored as part of our Management Review. We will enhance the skills and capabilities of our workforce and expand the capabilities of the factory infrastructure as required for our business and market needs.

Top Management has overall responsibility for the co-ordination of the Quality Management System throughout the Company. All employees are responsible for operating within the Quality Management System
